

Six 21 Digital Devices

At Six 21, we require all students to have their own digital device with them in school each day to aid their learning. As with all schools and colleges, it is also possible that some learning this academic year may need to take place on line and therefore a digital device will be especially crucial this year. All essential programmes/apps/textbooks/resources will be made freely available so you will not need to purchase these yourself unless you wish to do so. Whilst a laptop is the most useful device at sixth form for most subjects, students are also welcome to use a tablet or Chromebook instead. Mobile phones are unfortunately not suitable.

The minimum requirements for devices are:

- Screen size of at least 8 inches and ideally larger
- Keyboard (if you own a tablet a keyboard can be attached easily)
- Google Drive and Chrome installed (we can help with this at the start of term if necessary)

Your use of our network is subject to an acceptable use policy which you will sign in the first week of term.

If you do not have your own device and need advice before purchasing one then please contact the school's IT help desk (ithelpdesk@school21.org.uk).

If you need any financial assistance when purchasing a device then please contact the sixth form office (ecoppeard@school21.org.uk).
